

echo Command usage

- **Syntax :**
 - **echo [-neE] [Arguments]**
 - **Options:**
 - **-n** do not append a newline or trailing newline is suppressed
 - **-e** enable interpretation of the following backslash escapes
 - **-E** explicitly suppress interpretation of backslash escapes
- **Notes:**
 - **Without Options & without Arguments echo just prints/displays an empty line**
 - **Arguments :**
 - **Only String(s)**
 - **Only Variable(s)** (Variable can have any kind of data like: strings,chars,numbers,path,cmd output)
 - **Wildcard ***
 - **Command Output also**
 - **Combination of all these**
 - **Although not necessary, it is a good practice to enclose the arguments in double or single quotes**
 - **If we use single quotes Variables will not be expanded and wildcard wont work**
